

Prescription Refills

Please contact your pharmacy for prescription refills at least two to three full business days before your supply will deplete. Refills are issued only during regular office hours from Mon-Fri 8:00 A.M. to 5:00 P.M. Evening and weekend requests will be handled the following business day. Many insurance companies require special authorization for certain medications. Authorizations are usually completed within 72 hours after your pharmacy notifies our office. Our office will notify your pharmacy with all approvals. The patient, pharmacy and PCP will be notified of denials.
